

MUBASIR HALIDU

Accra, Ghana | +233 549 790 023

halidumubashir@gmail.com | linkedin.com/in/halidu-mubasir-44077b204 | github.com/Halidu-Mubasir

PROFESSIONAL SUMMARY

Full-Stack Engineer, Cloud Architect, and DevOps practitioner with 3+ years of experience building and shipping production-grade web applications across the entire software lifecycle. Proficient in React/Next.js frontends, Django and Node.js backends, and REST API design, with deep expertise in deploying applications through CI/CD pipelines, containerized environments, and cloud infrastructure on AWS and Azure. Experienced building AI-integrated platforms, multi-sided marketplaces, and Learning Management Systems. Strong background in cloud security, ISO 27001 compliance, Linux administration, and Kubernetes orchestration. AWS Certified DevOps Engineer Professional and Azure Developer Associate certified.

EDUCATION

American University of Beirut

MA in Computing in Education

Beirut, Lebanon

Sep 2025 - May 2027 (Expected)

Ashesi University

BSc. Computer Science | GPA: 3.75/4.00 | Magna Cum Laude

Eastern Region, Ghana

Jan 2021 - Aug 2024

CERTIFICATIONS & AWARDS

Certifications

- | | |
|--|---------------------|
| - AWS Certified DevOps Engineer - Professional | Aug 2025 - Aug 2028 |
| - Azure Developer Associate (AZ-204) | Jan 2025 - Jan 2027 |
| - AWS Certified Developer - Associate | Oct 2024 - Aug 2028 |

Awards

- | | |
|---|---------------------|
| - Magna Cum Laude Honors, Ashesi University | Aug 2024 |
| - The MasterCard Foundation Scholarship, Scholars | Dec 2020 - Aug 2024 |
| - Dean's List (GPA 3.5+) | Oct 2021 - Aug 2024 |

WORK EXPERIENCE

CloudFruition

Full-Stack Engineer, Cloud & DevOps Engineer

Remote, Ghana

Sep 2024 - Present

- Architected and developed AutoRollback, a full-stack CI/CD automation platform for Azure deployments with a Next.js dashboard and Django REST Framework backend, enabling teams to configure deployments, trigger automated rollbacks, and monitor release health - reducing failed deployment recovery time by 40%.
- Led ISO 27001 compliance assessment for PayInc's Azure environment, documenting control implementation status across 114 controls, identifying gaps in access management, encryption, and logging practices.
- Executed Azure RBAC remediation project, removing 50+ deprecated classic administrator roles and remediating elevated User Access Administrator privileges, reducing privileged access attack surface by 40%.
- Developed OAuth 2.0 multi-tenant authentication flows with tenant-specific token management and cascading Azure/GitHub resource selectors in React, enabling cross-tenant Azure resource access.
- Designed secure REST APIs with Swagger documentation, JWT authentication, input validation, and role-based access control, consumed by both internal dashboards and external client integrations.
- Built and maintained CI/CD pipelines in Azure DevOps and GitHub Actions covering automated testing, security scanning, and multi-environment deployment workflows across multiple client codebases.
- Automated infrastructure provisioning using Terraform modules and Python scripts across AWS and Azure, cutting manual deployment time by 60% and enforcing environment consistency across dev, staging, and production.

- Implemented comprehensive monitoring with Azure Monitor, Log Analytics, and custom KQL queries, surfacing metrics into real-time operational dashboards and reducing MTTR by 35%.
- Managed AKS clusters for microservices workloads, implementing auto-scaling, health probes, and image optimization - reducing container build times by 30%.
- Designed and deployed an automated mass email delivery solution on AWS using SES, Lambda, and CloudWatch, handling high-volume communications at 99.9% reliability.
- Administered Linux-based systems (Ubuntu, RHEL) across cloud environments, managing user access, system updates, performance tuning, and troubleshooting production issues.
- Mentored team members in cloud and DevOps practices, achieving 100% pass rate across AWS Cloud Practitioner and AWS Developer Associate certification exams.

GhanaNLP

Remote, Ghana

Machine Learning Engineer Intern

Jun 2023 - Aug 2023

- Built an interactive Gradio web frontend for an Automatic Speech Recognition model serving low-resource African languages, improving accessibility for researchers and non-technical end-users.
- Contributed to QA testing pipelines for speech recognition, text-to-speech, and translation models, implementing automated validation procedures prior to production deployment.
- Supported data collection and preprocessing by creating, annotating, and cleaning a large-scale dataset for the Dagbani language, strengthening the foundation for low-resource NLP research.

PROJECTS

Inspired Minds - Full-Stack LMS & Agency Website

2025 - Present

TypeScript, Next.js, React, Node.js, PostgreSQL

- Built a dual-product platform for Ghana's premier home tutoring agency: a public-facing marketing website and a full LMS with separate teacher and student portals.
- Implemented core LMS features including quiz creation and auto-grading, assignment submission and marking, lesson note sharing, and real-time in-app messaging between paired teachers and students.
- Designed a multi-role authentication system and database schema supporting teacher-student pairings, course management, and graded activity records across Nursery to University levels.

DASA Connect - Student Governance Platform

Nov 2025 - Jan 2026

TypeScript, Next.js, Django REST Framework, Docker, Recharts

- Architected and delivered a full-stack platform for the Dagomba Student Association (KNUST) using Next.js and Django REST Framework, centralizing governance and resources for 500+ students.
- Engineered a secure Election System featuring a wizard-style voting booth with secret ballot logic and real-time data visualization via Recharts, ensuring 100% voter integrity.
- Developed a Headless Admin Dashboard with RBAC to manage users, content moderation, and digital membership verification. Deployed via Docker multi-container architecture with GitHub Actions CI/CD.

Hifdh App - Cross-Platform Quran Memorization Tool

Jun 2025 - Jan 2026

React Native, Expo, Supabase, Gemini AI, SQLite

- Built a cross-platform mobile application using React Native and Expo to help users practice Quran memorization through randomized verse trials across 8 category types.
- Implemented an offline-first architecture using SQLite for local data persistence and expo-file-system for audio caching, enabling full functionality without internet connectivity.
- Developed a sophisticated trial generation system using the Gemini AI API with configurable session lengths and performance tracking.

Conversational Simulations - AI Historical Figures Chat

2025

TypeScript, Next.js, React, AI/LLM APIs

- Developed an AI-powered platform where users hold contextually rich conversations with persona-accurate simulations of historical figures, powered by LLM APIs with custom persona prompting.
- Designed the frontend with dynamic persona selection, conversation history management, and a chat interface optimized for educational engagement.

Fixit Ghana - On-Demand Service Marketplace

2025

TypeScript, Next.js, React, Google Maps API

- Built a two-sided marketplace connecting Ghanaian service vendors with customers, integrating Google Maps API for location-based proximity search and vendor discovery.

AI-Based Predictive Model for Diabetes Complications

Jan 2024 - Aug 2024

Undergraduate Thesis, Ashesi University | Python, React Native, ML

- Developed machine learning models to predict diabetes-related cardiovascular heart disease and nephropathy using real patient data. Applied SMOTE, PCA, and LDA, improving model performance by 20%.
- Built a cross-platform mobile app using React Native, integrated with Python-based ML models via REST APIs, enabling real-time predictions for patients and healthcare providers.

EV3 AutoDrive - Autonomous Robot Prototype

Aug 2023 - Dec 2023

Ashesi University | Lego EV3, Computer Vision, MQTT, ROS 2

- Built autonomous robotic car with computer vision integration, implementing MQTT for real-time communication and hybrid navigation architecture for obstacle avoidance and path planning.

Campus Connect Web Application

Jan 2023 - May 2023

React, Express.js, MongoDB, Google OAuth

- Developed full-stack web application with CI/CD pipeline serving 1000+ student users. Integrated Google OAuth and WebPurify for content filtering. Served as Agile lead, reducing feature turnaround time by 25%.

Election REST API - Campus Voting Backend

2023

Python, Flask, REST API

- Designed and built a RESTful backend for a campus electronic voting system, implementing voter authentication, candidate management, and real-time vote tallying with double-vote prevention.

TECHNICAL SKILLS

Languages:	TypeScript, Python, JavaScript, Java, C++, R, PHP
Frontend:	React.js, Next.js, React Native, Tailwind CSS, HTML5, CSS3, Framer Motion, OAuth 2.0
Backend:	Django, Django REST Framework, Flask, Node.js, Express.js, REST API Design, JWT, Swagger/OpenAPI
Cloud Platforms:	AWS (EC2, Lambda, SES, CodePipeline, CloudWatch, ALB/NLB, S3, IAM, DynamoDB), Azure (VMs, App Services, AKS, Azure DevOps, Azure Monitor, Log Analytics)
DevOps & CI/CD:	Azure DevOps, GitHub Actions, Jenkins, Docker, Kubernetes (AKS), Terraform, Ansible, Git, Linux (Ubuntu, RHEL)
Databases:	PostgreSQL, MongoDB, MySQL, Redis, SQLite
Monitoring:	Azure Monitor, Log Analytics, KQL, CloudWatch, Prometheus, Grafana
AI Integration:	LLM API Integration, Prompt Engineering, Machine Learning, NLP, Gemini AI
Other:	ROS 2, MQTT, Infrastructure-as-Code (IaC), PowerShell, Bash, Shell Scripting
